

Picture Effects in Snap Dragon

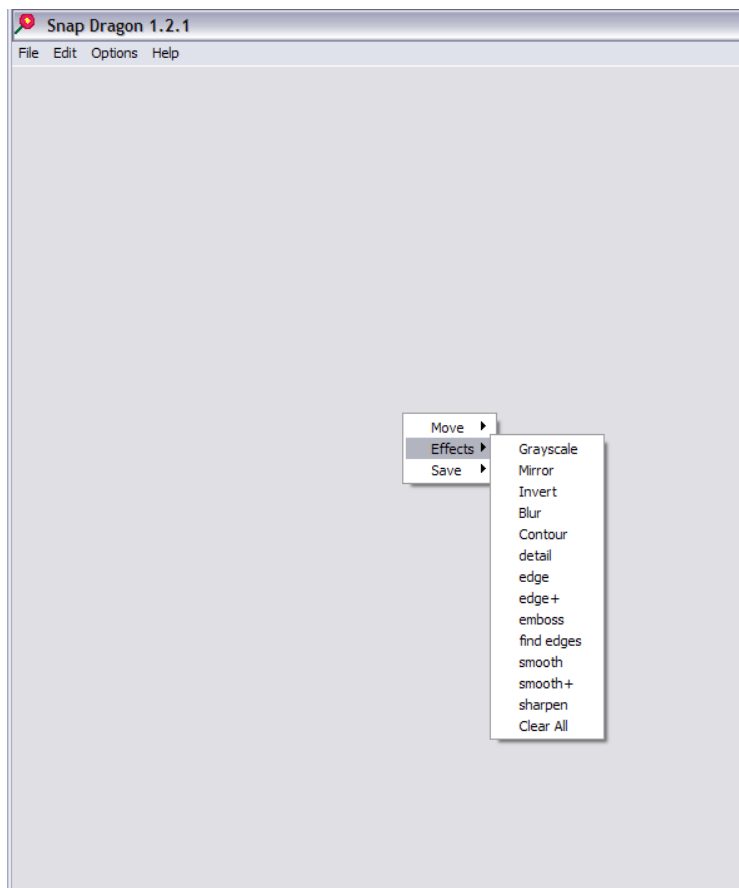

There are many useful things that Snap Dragon can do. One of those is picture effects

There are a variety of different effects you can apply to the picture previewer.

Click Edit -> Effects to see what you can do

Alternatively, right clicking to get the same options

I really like what a picture looks like with a picture effect applied. Is there any way I can save it?

Yes! I thought about this in advance. You can hold down shift and press a number key. This will save it under a different name. So you can save the original and an effect picture. However, don't confuse this with alt # which will remove a picture

Advanced Picture effects in Snap Dragon

Almost everything in Snap Dragon has a keyboard shortcut including effects.

Click Help -> Shortcuts to view a list of shortcuts
