

## To Save/Sort Pictures in Snap Dragon

Use the arrow keys to go through the pictures

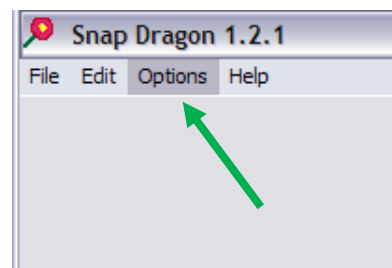

Once you find a picture you want to sort, press a number key ( 0 - 9 ). This will save the picture you are currently looking at to a folder corresponding to that number

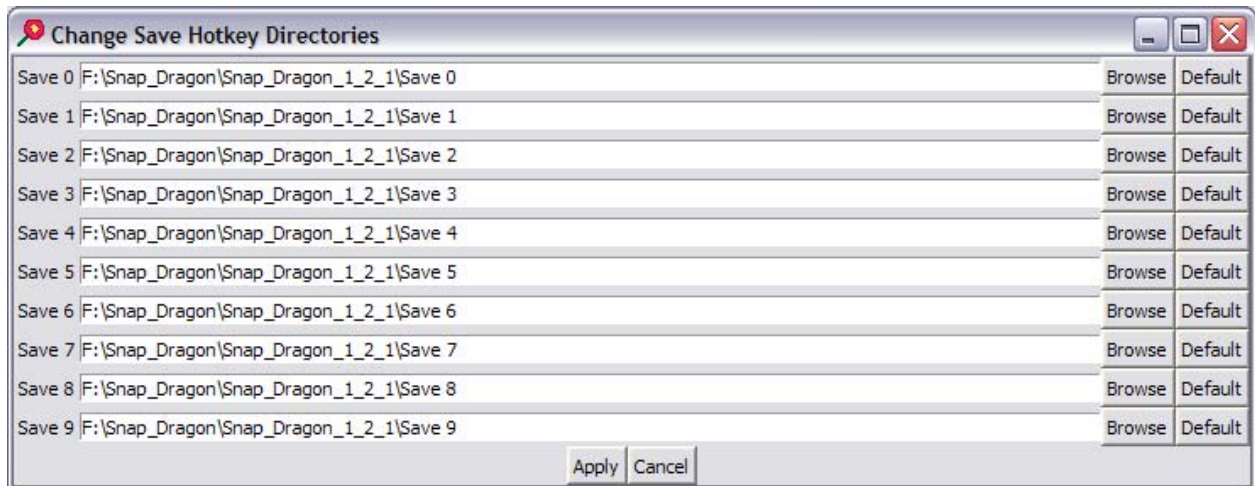

*Where can I find my pictures after I save them?*

Good question:

Click Options -> Change Saved

Here you will see a list of directories corresponding to the numbers 0 - 9. This is where the pictures go.

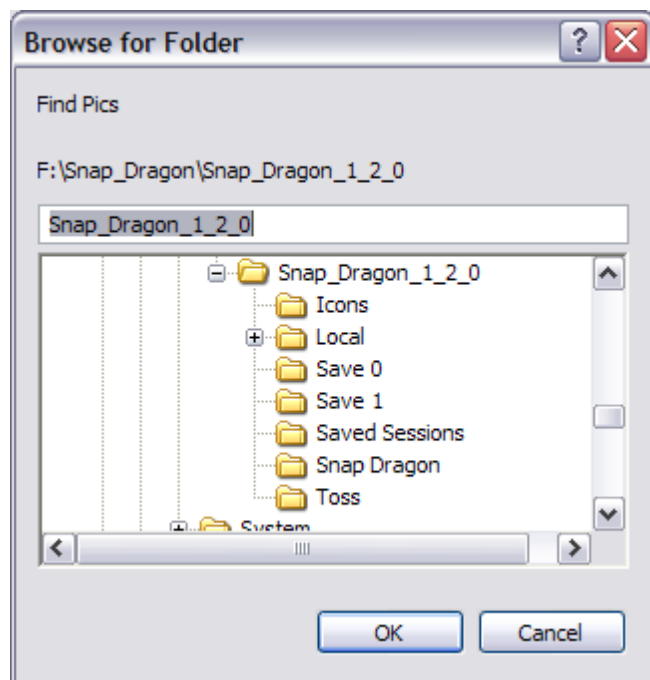

By default all the save folders are located in the same directory as the Snap Dragon.exe file wherever you chose to put it.

If you wish, you may change the directory the pictures save to wherever you want using the "Change Saved" window.

Just click "Browse", select the folder you want that number to save to and click "Ok".

Click "Apply" on the Change Saved window to save the changes.

## Advanced Picture Saving in Snap Dragon

*What if I accidentally save a picture to the wrong folder?*

It happens, no worries. Luckily I created a way you can remove pictures from folders. Hold down ALT and press the number you want to remove it from. Problem solved. This will NOT delete your original picture. It will only remove the copy that was placed in the sorting folder
